SKYLUX

LED Highbay

SKYLUX

A versatile, cost-efficient LED highbay.

Key Features

- *0-10V dimmable driver with 100-277v input range.*
- *Robust powder coated aluminium body.*
- *Optional quick-connect microwave motion sensor available with configuration remote control.*
- *1.5m Flex and Plug for simple 'plug & play' installation.*
- *Excellent luminous efficacy of up to 161lm/W.*
- *Optional surface mount bracket & 90° low glare lens available.*

Applications

Factories, Warehouses, Gyms, Indoor Sports Venues.

Standards

IP65 | IK08 | DIM | 110° | 50,000hr | 5yr | YES | RCM

Accessories

SENSOR REMOTE CONTROL

MICROWAVE SENSOR

SURFACE MOUNT BRACKET

SKYLUX *LED Highbay*

The SKYLUX® LED highbay range offers the best in luminous efficacy with outstanding performance of up to 162lm/W. The high output LED array, coupled with a 110° beam angle provides a wide & uniform illuminance to the workspace. This results in the need for less fittings to complete an installation, resulting in substantial savings on the overall investment.

Factor in the 'smart' technology and that's when it gets interesting. Add the optional sensor & you can configure each highbay to run at 10% of its full power when no movement is detected. This feature enables the fitting to remain on and draw as little as 12W of power in standby mode, then instantly power up to 100% when it detects movement. The sensor range, dimming level and time it remains at full brilliance for can all be programmed with the optional remote control.

Welcome to the next generation in industrial lighting. Welcome to SKYLUX®.

POWER	LUMEN	lm/W	CCT	WEIGHT	SAP CODE	PRODUCT CODE
120W	18200lm	152lm/W	5000K	3.00kg	2001896	**SKYLUX-120W**
